# **Sphinx PoC Documentation**

***Release 0.9***

**Henryk Paluch**

**Dec 28, 2020**

**CONTENTS:**

<b>1</b>	<b>Setting up Sphinx example</b>	<b>1</b>
1.1	HTML Output . . . . .	1
1.2	PDF Output . . . . .	1
<b>2</b>	<b>Indices and tables</b>	<b>3</b>

## SETTING UP SPHINX EXAMPLE

Tested under Debian 10

At first install git and checkout this example project:

```
sudo apt-get install git
mkdir -p ~/projects
cd ~/projects
git clone https://github.com/hpaluch/html-and-pdf-generators.git
cd html-and-pdf-generators
```

### 1.1 HTML Output

Install at least these packages to use Sphinx with HTML output:

```
sudo apt-get install make python3-sphinx
```

Then run this command to generate HTML version of documentation:

```
# invoke this under ~/projects/html-and-pdf-generators/sphinx/ directory
make html
```

To preview generated HTML documentation use command like:

```
python3 -m http.server --directory build/html/ 8080
```

HTML Publishing: just copy all files from *build/html/* to your Web hosting site.

### 1.2 PDF Output

Ensure that these packages are installed:

```
sudo apt-get install make python3-sphinx \
    latexmk texlive-latex-recommended texlive-fonts-recommended \
    texlive-latex-extra
```

Run this command to produce PDF output *build/latex/SphinxPoC.pdf*:

```
make latexpdf
```

## INDICES AND TABLES

- `genindex`
- `modindex`
- `search`
